

# Pantone View Home Color Trend Book for 2006

***NOW AVAILABLE!***

The color directions for home furnishings for 2006 show some interesting new movements, especially in very original, intricate and not at all ordinary or rigid color combinations.

As leading lifestyle indicators are exceedingly diverse, they are reflected in multiple color trends. The eight palettes we put forward provide a road map for future design and color directions.

There are three major pathways of color that encompass a sophisticated “uptown” look, a funky and stylish “downtown” look and several other palettes which are heading out of town - some of which are closer to home in bucolic settings, while others lead to more exotic destinations.

Affordable and Inspirational!
